WEDNESDAY, JUNE 18, 1902.

YOUNG MEN ON THE FARM.

It is said that there has been a turn in the tide and that whereas a few years ngo young men from the country were flocking to the cities the tendency now is for young men in the cities to go to the country. We believe that this tendency will be more and more from year to year, and for several very good reasons. The cities are overcrowded and it is hard for a young man, unless he has had thorough training, to make more than enough to take care of himself, and at negroes and Filipinos, but they had best his work is hard and the hours of service long and tedious. On the farm he has to work during certain seasons very hard and from sun to sun. But after the crop has been laid by he can take a long vacation and either enjoy himself at his country home or take a as the Philippine affair recalls day by trip to some of the various resorts, where he is always welcome.

It has been abundantly demonstrated that intelligent farming in Virginia will The farmer must know what he is about. He must understand the charncter of the soil which he tills; he must knew what sort of crops to plant and what sort of fertilizers to use; he must study market conditions and raise those must work hard in season and he must apply the ordinary rules of business to his farming operations. But if he will do all this he is almost sure in ordinary season to make good crops and to clear a round sum of money at the end of the He may handle a little more money in

town, but he will pay out the greater portion of his earnings in board and lodging and clothes and in incidental expenditures, which young men consider necessary in city life. On the farm his board and lodging are so small as hardly to be taken into account and his incidental expenses are correspondingly small. If he is a man of family he can produce on the farm almost everything that the family consumes, and, all things else being equal, he will turn in more cash to the profit account when he is engaged in successful farming than when he is working on a salary in town. This, to say nothing of the question of independence and the question of health. But the inevitable trolley line is do-

ing a great deal and will do a great deal more as it grows to induce young men to make farming their occupation in life. A farm on a trolley line within easy reach of some town or city is a very different proposition from a farm in the remote regions, where the roads are wretched and where access to the trade centres is difficult. These trolley lines are growing with wonderful rapidity and they are reaching out from the city of Richmond in all directions. Farms along the lines of such roads are very valuable and will become more and more valuable, and it is our deliberate opinion that any young man who will purchase such a farm, even though it be but a few acres, at present prices will be able to make a comfortable living and will have the satisfaction of seeing his land increase in value from year to 'year at a rate largely in excess of the interest on the Investment.

### AMERICAN RAILROADS.

The Norfolk and Western Railroad proposes to spend half a million dollars glong its lines in various improvements. This company has already expended vast sums of money in bettering its road-bed and equipment, and the work still goes on. The net earnings have been put into the property rather than into the smoke and the soct and dust and grime, pockets of the stockholders. The company is earning a large percentage on the earnings is being paid to the stockholders. It is deemed wiser to improve the property rather than to pay large flividends.

This is true of all the Southern roads and true of most of the railroads throughput the country. There was a time when they were run in a hap-hazard way, but all such properties are now being man aged upon strictly business and well-recpgnized economic principles. And so it has come to pass that railroad stocks are regarded as gilt-edged investments. Instead of borrowing money to make improvements and so increasing the bonded \*ficht of the road, it is the policy of thosa who manage American railroads to pay for improvements out of the yearly earnings. But the time will come when it will not be necessary to spend so much money in this direction, and the stockholders will get their turn by and by. In view of these facts, it is not surprising that railroad stocks have immensely thhanced in value during the past sevtral years. If this policy is continued they will be worth much more in years to come.

----

THE NORTHERN CONSCIENCE. Noting the fact that "King Edward loses no opportunity to praise the heroic constancy of the Boers," and that General Kitchener in addressing one of the surrendering contingents of the Boer army, told them that "if he had been high view to take of education, but it one of them he would have been proud is the correct view, and if all our college of such a record for unflinching valor ts they had," the New York Evening Post inquires why American statesmen the millennium would be brought much tnd army officers cannot speak publicly such words of generous appreciation of 1 conquered army. "We wish," adds the Post, "that we could parellel such magsanimous language from any of our ad-

iresses to the Filipines." Was the conduct of the Filipines nobler er more heroic than the conduct of the ferred stock with bonds, is of general Bouthern Confederates in their fight for interest. southern rights, and for the principle. which to them was dearer than life? Yet I the Evening Post has ever indulged in Jersey that preferred stockholders are 'magnanimous language" concerning the shareholders, and have vested property fonduce of the boys in gray, we have rights which cannot be impaired,

failed to note the fact. It is a curious thing to us that these Filipinos are so much more precious to certain gentlemen at the North than were their own brethren in the South. They think that the Filipinos have been treated outrageously by the United States Government, but it does not seem to occur to them that the conduct of the Norm was anything else than magnanimous and generous toward the Southern Confed-

But every rebuke which the Evening Post and those who belong to its school see fit to give to the administration for its conduct toward the Filipinos is ten times more a rebuke to the North for the manner in which the South was treated during that war, and especially after the war and during the notorious period of reconstruction. Remembering how the South was treated, with what spite and venom and vengeance, we confess to disgust ad nauseum when we read of the tender solicitude of these Northern philanthropists for the residents of the Philippine Islands. Their sympathies are wonderfully aroused by nothing but the gall of bitterness for the heroic men and women of the South. This thing comes home to the Northern people every day, and we have reason to believe that the conscience of many a Northern man has been lashing him day the 'Southern affair." But chickens will come home to roost by and by.

### ANOTHER BRYAN PROPHECY.

Mr. William J. Bryan recently paid a visit to Cuba and then wrote an article for Collier's Weekly, in which he gave out his conclusions as to the status and prospects of that new republic. He intimated that Cuba was on the eve of anoproducts which are in good demand; he ther revolution, but President Palma does not agree with him.

"If Mr. Bryan," he says, "really thought he heard the distant roll of revolutionary drums and a whispered call to arms in this island when he was here, then the people of Cuba, all of us, have cotton in our ears. I have received no notice of disturbances or of anything except utmost harmony among all elements."

If President Palma will secure the files of an American newspaper and read some of Mr. Bryan's speeches delivered in 1896, in which he predicted terrible disasters for the United States, he will come to the conclusion that Mr. Bryan as a prophet is a dismal failure and that Cuba is not doomed because Mr. Bryan says so. Mr. Bryan reminds us of some of the weather prophets. He is not discouraged by the failures of the past, but seems to think that if he keeps on prophesying he will hit it right by and by. That may be, but his prophecies are

not generally based on fact and argument-they are much in the nature of iridescent dreams and are scarcely more reliable. There may be trouble ahead for Cuba, and we fear that there is, but it is rather encouraging for Cuba that Mr. Bryan has made evil predictions against it, as Mr. Bryan has a sort of talent for being always wrong in his prognostica-

This is nothing against Mr. Bryan's character. He is a most amiable gentleman and he is sincere and honest, but he is given to seeing visions and dreaming dreams, and when he drops into that mood he is not to be taken seriously,

### OIL FOR FUEL.

It is probable that the coal strike will have the effect largely to increase the use of oil for fuel. It is said that oil can be brought from Texas to New York and sold at a price which will make it quite as cheap as coal at \$3 a ton. A quite as cheap as coal at \$3 a ton. A
Baltimore correspondent says that oil
instead of coal is now being used at some
of the largest factories in that city,
among them the Baltimore Car Works
and the Maryland Steel Company. He
and the Maryland Steel Company. He
river which is rising rapidly. asserts that these concerns find oil less expensive than coal and more exective and much cleaner, in that it does away entirely with the great clouds of black The combustion in the furnace is nearly perfect, and it would be a great relief its common stock, but only 2 per cent. of | to Baltimore to be rid of the dirty smoke that issues from furnaces using coal. One of the New York papers goes so far as to say that the coal strike may be a blessing in disguise, as giving the manufacturers the means of discovering a cheaper and better fuel.

The State Board of Assessors of New Jersey have recently filed wit hthe State Comptroller the first schedule of taxes imposed upon companies organized under the laws of that State. The schedule includes 4,648 companies, which will be compelled to pay an aggregate tax of nearly \$2,000,000. This is the annual tax imposed on companies for the privilege of being allowed to do business as corporations organized under the laws of New Jersey. and is independent of the filing fee made by these companies when they were incorporated.

Virginia might have been enjoying much of this revenue if through her prejudice against trusts she had not compelled the American Tobacco Company to go to New Jersey for a charter. That was New Jersey's opportunity, and she was

Years ago Mr Cleveland thrilled the country by saying that "a public office is a public trust." Yesterday he said to some college students that education is a trust, and the young man who receives a good education must not hide his treasure in a napkin. That is a very men received their education in trust and would use it for the benefit of humanity nearer.

CURRENT TOPICS.

Origin of "Clevelandizing."

A Lincoln, Neb., dispatch quotes from a letter written by William J. Brayn to Senator Allen, Populist leader, reiterating his firm determination not to accept the gubernatorial nomination, as fol-

There is no office to which I aspire. I am not only content to do the work which I am now doing, but I believe that in this way I can accomplish more for my State and for the United States. My candidacy is not necessarily to de-feat the reorganizers. While I expect to do all that is within my power to aid those who are determined to prevent the Clevelandizing of the Democratic party, yet the success of that effort does not depend upon me nor upon any does not depend upon me nor upon any influence that I may be able to exert, but upon a multitude of earnest, honest and loyal Democrats who will spare no pains to protect the party from another such humiliation and disgrace. The term "Clevelandizing of the Demo-

cratic party" is used in connection with efforts of certain former leaders to steer the Democratic party off the shoals of Populism and float it in the deep water of conservatism, for which its architects laid the keel. The name "Cleve-landizing" is in honor of one G. Cleve-land, of Princeton, N. J. He was never a politician, but for some reason, in defiance of the leaders of their party, the Democrats, on three occasions, ran him for President and twice elected him. Mr. Bryan, the well-known Nebraskan, has, since these occurances, run for the same office twice without success, and it is probable that in his admiration for a man who succeded where he failed the Nebraskan is endeavoring to thus prepetuate his name by attaching it to a political policy.-Charlotte Observer.

Discrimination Against the Whites.

Miss Lee's violation of the Jim Crow law of this State is simply corroboration of what the Index-Appeal has previously said on the separate car question, it was characteristic of the Anglo-Saxon race to take what it wants in spite of municipal regulations, provided such taking involves no moral turpitude. So far as the Jim Crow law has oper-So far as the Jim Crow law has operated in Virginia, it has been a discrimination against the whites to the advantage of the negroes. It has been fairly and impartially enforced, equal accommodations being provided for both races, and the whites not permitted to intrude upon the colored reservation, even though the cars set apart for the whites were crowded to suffocation. As a matter of crowded to suffocation. As a matter of social distinction, respectable colored people have had to suffer for the con-duct of disreputable members of ther lown race, but there is no doubt that the ef-fect of the law has been salutary in many ways, especially in preventing race collisions, which frequently occurred on passenger trains before the law was adopted.—Petersburg Index-Appeal.

### YEMASSEE AGROUND

Clyde Line Steamer in Perilous Condltion Yesterday.

The stern line of the Clyde line steamer Yemassee became entangled in the large propeller yesterday morning a few minutes after she left her wharf, and before the vessel could be gotten under control

being tossed in every direction by the river, which is rising rapidly.

The crew and passengers were becom-ing alarmed and some excitement pre-vailed. The boat was finally thrown on the sand bar below Rocketts wharf. Captain O'Neil gave orders to drop the anchors and make her fast. The city tug Thomas Cunningham, Sr., came to her assistance and rendered all aid possible. Several other tugs were ordered to her rescue, and after five hours of hard work she was pulled off the bar at 2 o'clock esterday afternoon.

### MAMMOTH COTTON MILL

One to be Built at Greensboro that will be Largest on Earth.

(Special Dispatch to The Times.) GREENSBORO, N. C., June 17 .- Moses and Caesar Cone, large mill and real esand Caesar Cone, large mill and real estate owners in this State, announce this evening their purchase of sixteen hundred acres of land adjoining this city, on which they will at once begin the erection of another cotton factory and mill village. The mill will make blue denims goods exclusively and will be the largest plant of the kind on earth. There will be 30,000 splndles and 3,000 looms in operation, enploying 3,000 operatives. It will cost one and a quarter millions. Material and supplies have already been contracted for, and estimated time required for completing building is in one year. ing building is in one year.

### ACCIDENTALLY SHOT

Buford Kirkland Wounded by His Brother While Target Shooting.

## Facts of Interest For the Housewife.

All communications addressed to this department must be written in ink and accompanied by name and address Both will be held confidential.

Correspondents will please write the names of their places of residence in full. Letters go astray daily because he address is given merely as "City." There are forty-five of these United States and many cities in each State.

There are many companies now adver-tising for people-to do copying at home. On answering these advertisements you receive a letter, making many promises and saying if you will send a stated sum, perhaps a dollar, you will receive the articles you are to copy and the outfit. I have been told and I judge from the letters that when the "firm" gets the money you never hear from it again, or, at least, that there is some hitch in or, at least, that there is some inter in the proceedings. I should think that in this age of typewriting there would not be any demand for such work. Do you know whether any of these "firms" are legitimate? V. J. M. It cannot be said that none of the offers referred to are from honest firms, and

referred to are from honest firms, and made in good fait... The proportion of these is small, by comparison with the multitude of "rare chances"—"unparalleled opportunities for making \$3, \$5, or \$10 a day by working in your own homes." As a rule, distrust these specious lures to investment of even \$1, when you have few dollars, and none to throw away lessons in human nature. Firms that have copying and addressing envelopes to give out find no difficulty in securing men and women to do such work. A sign in the office window that such aid is needed will in a day bring fifty applicants for every situation.

Notwithstanding the prevalence of typewriters, envelopes are addressed by the ten thousand with a pen. It is still worth while to write a clear, clerky hand.

1. When a lady is writing to a gentleman, who is not a special friend, should she begin the letter, "Dear Mr. Blank," or "My Dear Mr. Blank?" Which is the more formal?"

2. Upon receipt of an invitation to a

wedding reception in a distant State, where it is impossible to attend, and the parties to which are not particular friends, what form of "regret" is it best to send?

LUCILE. "My Dear Mr. Blank" is a trifle more

formal than "Dear Mr. Blank."
2. Send your visiting card in season for it to be received upon the day set for the reception. Write upon it.

# FULL PAY FOR SCHLEY

Senate Naval Committee Orders Favor

able Reporter, Bill.

(By Associated Press.)

WASHINGTON, June 17.—The Senate Committee on Navai Affairs to-day authorized Senator Hale to make a favorable report on Senator McComas' bill giving Admiral Schley the pay of a rearadmiral on the active list of the navy. As a retired officer he now receives only three-fourths of the pay of a rear-admiral on the active list.

on the active list.

The bill was amended by the committee so as to eliminate the preamble reciting that the admiral was in absolute command of the American forces at the time of the battle with Cervera's fleet off Santiago.

Will be at Lake. St. Luke's picnic will take place to-day at Lakeside Park instead of at Young's
